## **Bespoke Training Courses - For targeted, cost-effective training**

### **Available either on-site or at our classrooms**

- Do you have particular modelling problems to be solved?
- Are you concerned about an approaching deadline?
- Would you like to see a project progress & learn from an expert at the same time?

We can deliver industry specific Rhino modelling & Visualisation advice. As the most experienced Rhino trainers in the U.K. we can support all key disciplines and users.

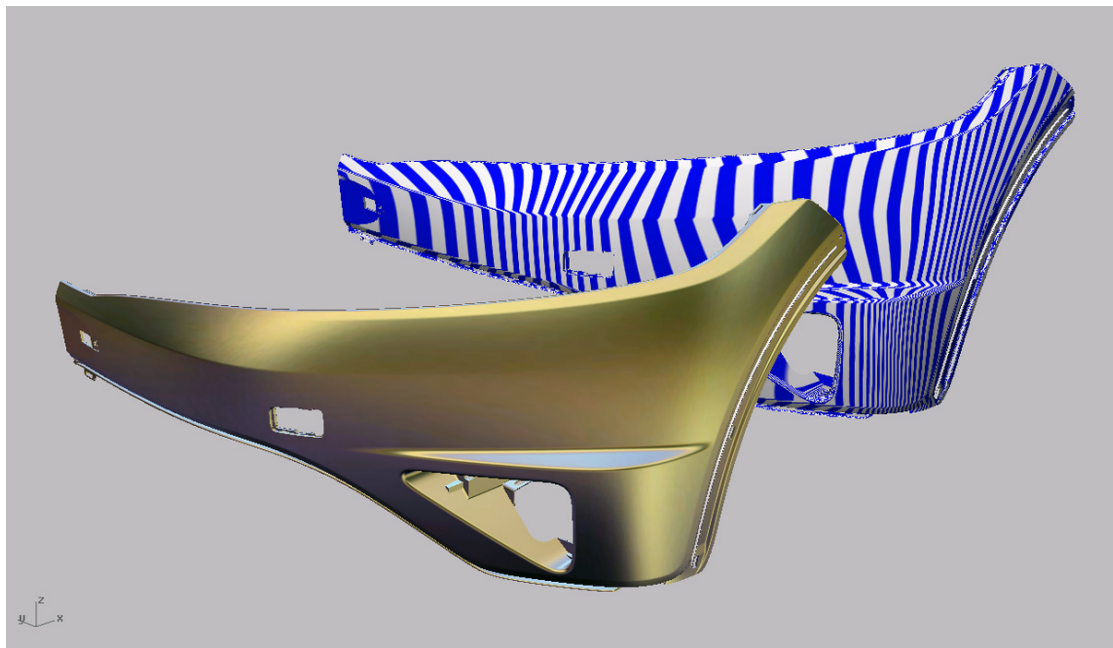

All our trainers are certified Rhino trainers.

### **Why choose bespoke training?**

All course content is tailored to your needs, enabling us to:

- Cover as much ground as possible in a shorter time
- Choose the most appropriate content from several courses
- Pass on skills for the specific project or task
- Get focused attention to your specialist users

All our bespoke courses are designed to be interactive and engaging.

### **How we organise bespoke training courses**

Upon booking, we agree the level of training and general content needed.

We then nominate your certified Rhino trainer and they agree the specific content you wish to cover. In direct consultation with the trainer concerned, we ensure the course provides exactly the right content.

Simply Rhino have trained 100's of Rhino users in the U.K. Customers who have benefited from our Tailored Training include:
